

Fake sunglasses may leave you in the dark

Counterfeit sunglasses...

1

Could increase risk of **blindness** and **eye cancer**

2

Fail to block **UV light** from reaching our eyes

3

Might be made using potentially **harmful materials**

4

Are not tested for **safety**

If the sunglasses are real, they'll feature the **model number, color, lens and frame size** as well as the **manufacturing country** on the sunglasses' arms as well as on the box.
