

5 ways to avoid counterfeits

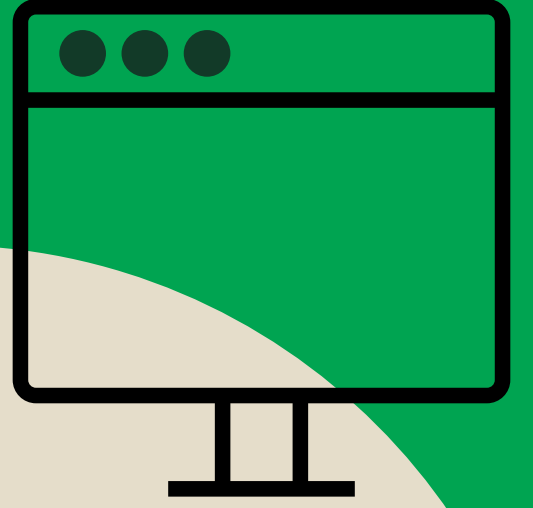

1

Only purchase from **trusted sources**.

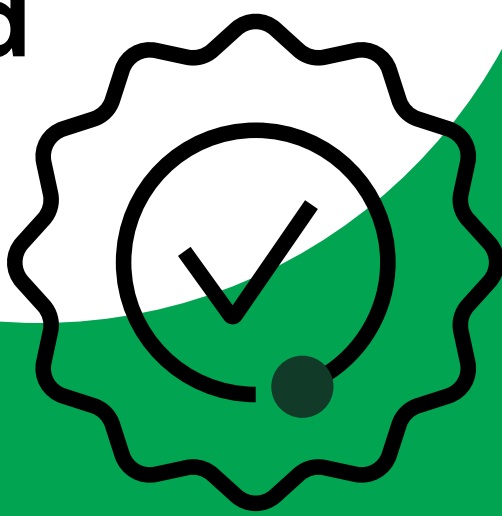

2

Check electrical **manufacturer website** to find authorized retailers and distributors

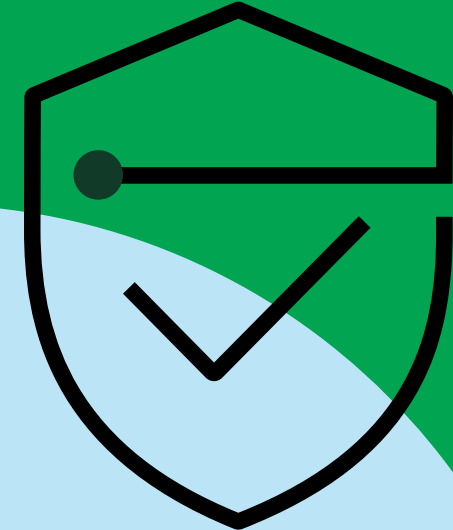

3

Only purchase items that have been **tested** and **marked**

4

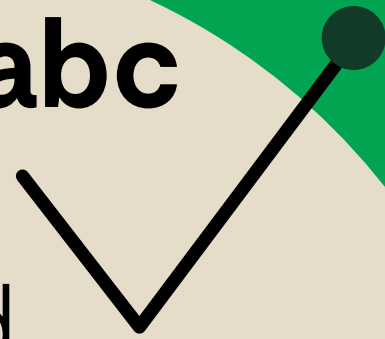

Only use **licensed insured, and bonded contractors** that will stand behind their work

5

Products and packaging with **typos** and **misspellings** have a high likelihood of being counterfeit

abc

Using qualified electricians and purchasing from **reputable distributors and retailers** gives you: safety, security, and the backing of the manufacturer.
