

# Don't get burned by fake sunscreen!

**Fake sunscreen:**

**Travelers have reported being burned using fake sunscreen**

**1**

May be a lotion-like substance packaged to look like familiar brands

**2**

May cause rashes and irritation

**3**

May contain unknown chemicals which don't protect the skin from harmful UV rays

**To protect yourself:**

**You should always wear sun protection, but look out for counterfeits**

**1**

Look for suspicious packaging and only buy from reliable vendors

**2**

When traveling, bring your own sunscreen from a brand you trust
