

What you need to know about water filters

Counterfeit Water Filters ...

- 1** fail to remove **contaminants** from your drinking water such as lead, mercury, herbicides, pesticides, asbestos and pharmaceuticals.
- 2** are commonly sold **online through third-party sites** disguised as genuine, certified products.

- 3** leak and damage your refrigerator and kitchen.
- 4** violate your **refrigerator's warranty**, costing you additional time and money for repairs.

Authentic Water Filters ...

- 1** are **unique** to each refrigerator manufacturer and **are not interchangeable** or "one-size-fits-all."
- 2** are appropriately **designed and tested** for your **safety**.

- 3** meet the standards for safe, clean drinking water.
- 4** must be **designed specifically for your refrigerator type** to fit and function properly.

By choosing a filter that is trusted and sold by a refrigerator manufacturer, you can...

... Rest easy knowing that the filter's ability to remove harmful contaminants has been tested and certified.

... Avoid spending the time and expense of repairing your appliance should the filter crack, leak or burst.

... Feel safe knowing the filter will not damage your appliance.
